Professional Summary

Aspiring Full-Stack Web Developer with a strong foundation in frontend and backend technologies. Proficient in HTML, CSS, JavaScript and MERN stack with hands-on experience in building and deploying personal projects. Passionate about creating user-friendly, responsive, and scalable applications. Seeking an entry-level position to apply my skills, enhance my expertise in full-stack development, and gain real-world experience in the industry.

Technical Skills

- **Languages/Technologies:** HTML, CSS, JavaScript, Node.js
- **Frameworks/Libraries:** React.js, Express.js, Zustand, Tailwind CSS, Socket.io
- **Version Control:** Git, GitHub (Basic)
- **Other tools:** Visual Studio code, ChatGPT
- **Database:** MongoDB

Projects

1. **Chit-Chat** - A full-stack chat application with JWT authentication and Socket.io for real-time messaging. Features include secure login/logout, instant message updates, image sharing and online status tracking. Built with React.js (frontend), Node.js & Express.js (backend), MongoDB (database), and WebSockets for real-time communication. Deployed on Render.com.
 - Live Demo: [MERN-chat-application](#)
 - Github repository: <https://github.com/Ujjwal-1809/MERN-Chat-app>
2. **RiddleRush** - Developed an engaging riddle-solving game using React.js, demonstrating skills in dynamic UI development and state management. Optimized image assets and deployed the application using Vite for fast load times and seamless performance.
